BALANCERS

PH INCREASER

Low pH makes water corrosive which is uncomfortable and will slowly eat away at sensitive equipment.

C003941-CS20P5 1 lb (12 /case)

PH DECREASER

High pH will make water uncomfortable, lead to scale formation, and impacts the cleanliness of the water.

Enjoy a premium spa experience with none of the extra work – thanks to Gentle Spa.

GENTLE SPA

When Gentle Spa is added to spa water, maintenance becomes noticeably easier. It helps stabilize pH and alkalinity—two of the most common challenges in spa care—so water stays balanced longer. Its advanced formula also helps prevent staining and minimize calcium-related issues, reducing the need for constant adjustments. The result is exceptional water clarity that stands out immediately. Bathers will appreciate the silky-soft feel of the water and the light, refreshing fragrance it leaves behind.

ALKALINITY UP

Alkalinity helps keep pH in the ideal range. Even if pH is in range, low or high alkalinity can create havoc in water.

C003943-CS20P5 2 lb (12/case)

CALCIUM UP

Spa water needs calcium in it. Too little calcium, water is corrosive and leaves conditions where water can foam quickly.
